JoF7 Bubinga

Without compromises

Know-how from different groups of expertise is not combined too often – but when it happens, the result is extraordinary. JoF7 is no exception.

Reporters from the Swedish Hunting Magazine “Jaktmarker och Fiskevatten” are hunting more than 400 times per year, and at EKA skilled craftsmen manufacture Swedish quality knives 365 days per year. In the autumn of 2005 these groups had a first meeting in Karlstad with only one purpose in mind – to create a unique knife in aspects of form and application.

No cost compromises were allowed! One year later we can proudly present the result – JoF7.

The finger grip on top of the blade is a small detail that we think you have not seen on any other knife. Use it for the thumb or index finger when skinning an animal.

Feel, enjoy and use. We think you will be satisfied.

EKA-knivar Jaktmarker och Fiskevatten

Properties:

Steel: Sandvik 12C27, 4mm

57-59 HRC

Oiled bubinga handle

Leather Sheath
